

TECHNICAL DATA SHEET

PRODUCT NAME : SODIUM BICARBONATE 99% MIN.
FORMULA : NaHCO₃
APPEARANCE : White Powder
APPLICATIONS : Baking powder in cooking, baking soda is primarily used in baking as a leavening agent. Sodium bicarbonate was sometimes used in cooking green vegetables or wash chemical on vegetables. When adding acid, alkaline ingredients such as whole milk or Dutch-processed cocoa are often added to baked foods to avoid an over-acidic taste from the added acid. Sodium bicarbonate plays an important role in animal nutrition today. Primarily used as a dairy cow feed supplement, the buffering capability of Natural Soda's pure and natural feed grade sodium bicarbonate helps stabilize rumen pH by reducing acidic conditions.

PROPERTIES	SPECIFICATION
Purity	99.00% min.
Sodium (Na)	27.00% min.
Loss on Drying	0.20% max.
pH	8.00-9.00
As (Arsenic)	0.0001% max.
Heavy Metals (Pb)	0.0005% max.
Chloride (Cl)	0.40% max.
Cadmium (Cd)	0.0002% max.

PACKING : 25 KG/BAG

ORIGIN : China
